MAPP Schedule F OATT Transmission Reservations

Commencing September 1, 2009 and coinciding with the integration of the MidAmerican Energy Company, Muscatine Power & Water, and Cedar Falls Utilities transmission systems into the Midwest ISO, no new transmission service will be granted under the MAPP Schedule F except for a Redirect on a non-firm hourly basis of existing confirmed, firm Monthly Service or with respect to the Resale of an existing reservation. Only Redirects utilizing service points valid under MAPP Schedule F RTC Transmission Owning Member footprint as of September 1, 2009 will be considered valid for a Redirect Request i.e. WAPA (IS), DPC, & MPC. All MAPP Schedule F reservations will terminate the earlier of the end date on the reservation or 00:00:00 CD April 1, 2011. Modifications to the MAPP Policies and Procedures for Transmission Operations reflecting these changes are being prepared for Subcommittee approval. The MAPP Schedule F reservations will remain on the MAPP tariff page on the MAPP OASIS node for their duration and will be administered under the MAPP Schedule F tariff and related business practices.

Please also be aware that for all MAPP Schedule F reservations Confirmed prior to September 1, 2009 that identify a current MEC, MPW, or CFU POR/POD, the Midwest ISO will be creating a companion transmission service reservation (TSR) on the Midwest ISO OASIS to reflect the consolidated capacity of the MAPP reservations on the MEC/MPW/CFU systems for each of the impacted Transmission Customers. Individual MAPP Schedule F reservations involving MEC, MPW or CFU sources or sinks will not be represented on the MISO OASIS. This new companion MISO TSR must be listed on the e-tag with the transmission provider (TP) of MISO, and appear in the transmission path of the tag along with the corresponding MAPP Schedule F TSR for the tag to pass validation. The MISO TSR is necessary for the MISO settlement process. The impacted Transmission Customers and the associated MISO TSR reference number for tagging purposes are shown below:

- AMES TSR 76773235
- REMC TSR 76773236
- MECB TSR 76773237
