

April 3, 2009

On April 1, 2009, MAPP members LES, NPPD, and OPPD, placed their facilities under the SWPP tariff. Part of that transition was the migration of TSRs from the individual OASIS sites on the MAPP OASIS node to the SWPP OASIS. During the transition, an error was discovered in the sharing of TSR coordination data. Without this information, it is likely that affected flowgates would be significantly oversold. To avoid that situation, TranServ, as the contractor for Tariff Administration Services, is retaining the pre-transition MAPP OASIS TSR information for use in AFC calculations.

An updated posting will be made once the error is corrected.
